Themes so far

- Harm from opioids (2011-2012 data)
 - constipation
 - Over sedation

- Themes from 2013 data yet to be analysed

Translating data into action

Adverse Events per 1000 Bed Days (Inpatients)

Translating data into action

Adverse Events per 1000 Bed days (Non-Inpatient)

Disseminating the information

- Presentations to
 - Clinical Directors
 - Clinical Nurse Directors
 - Charge Nurses

Improvement opportunities identified / projects undertaken

- Opioid Project
 - Constipation identified as significant harm relating to administration of opioids
 - Project undertaken on single ward to identify contributing factors and develop & test potential solutions
 - Data to be presented
- Oversedation
 - 5 cases identified in single ward from 130 randomly selected charts over 3 month period
 - For more in depth chart reviews to identify contributing factors

Any challenges

- Appropriate forum to share GTT data for improvement
- Engaging clinicians at the frontline

Lessons learnt

- Improvement projects need to be taken up by the appropriate organisational group

Ideas for sharing

- Refinements of the Florida Subcategories
- Use of shared workspace for learning cases

Future developments

- Implementing Mental Health ADE Trigger Tool
- Involved with potential implementation of Primary Care Trigger Tool in association with the primary care patient safety initiative at CMH
